

Figure 1 displays a grid of dot plots showing Raked values for five racial groups (AIAN, API, Black, Hisp., White) across five causes (All, Comm., Inj., NCD, and an unlabeled fifth column). Each plot compares three counties (Kent, New Castle, Sussex) for 'Initial' (blue dot) and 'Raked' (orange square) values. The x-axis is 'Raked value' from 0.0000 to 0.0035. The y-axis is 'Race'.
